

## PRESS RELEASE

*Galitt is now listed as an approved cybersecurity service provider for SWIFT members*

**Boulogne (France), October 23<sup>th</sup>, 2017**

***Building upon its long-standing experience in card payment security, Galitt is expanding its scope to cover all aspects of cybersecurity for financial transactions making the company the only specialist of payments in Europe to be listed in SWIFT directory of cybersecurity service providers.***

SWIFT, the world leading provider of secure financial messaging services, has an uncompromising approach to information security. In this context, the international organization has set up a set of information security measures, called the "Customer Security Programme (CSP)," a framework dedicated to supporting SWIFT customers in their fight against cyberattacks.

The SWIFT Customer Security Controls Framework describes a set of mandatory and advisory security controls for SWIFT customers: they have to complete a self-attestation against (at least) all mandatory security controls by the end of 2017. Self-attestation can be fully completed in-house by customers' own cybersecurity experts, but many customers are looking for third party companies to help them address cybersecurity within their own organizations and to help them comply with the mandatory controls.

SWIFT has now listed Galitt as a member of its Directory of Cybersecurity Service Providers, making Galitt a recognized source of expertise for SWIFT customers in need of support to comply with the mandatory security controls.

Galitt is the only company specializing in the banking and payment industry, listed in SWIFT Directory of Cybersecurity Service Providers. This is recognition of Galitt's strong experience in secure transactions and cybersecurity as well as its intrinsic knowledge of major players of the banking and payment industry, especially in France.

Galitt offers banks, financial institutions, merchants and others, the services they need to ensure their equipment, procedures and methods are secured and complied with relevant security requirements (PCI standards including: PCI DSS, PCI Card Production, Point-to-Point Encryption, as well as those specific to the French "Cartes Bancaires" system. Galitt builds upon its longstanding expertise in payment systems to support its customers with all ongoing evolutions in the fields of cards, mobile payment, instant transfers, financial exchanges and, more globally, all the technology changes that are affecting the payment industry.

Rémi Gitzinger, Galitt Executive Director of the Payment Consulting Business Unit declares: "Galitt has developed an expertise in all aspects of the payment and more globally the financial industry. Our services are already recognized by all certification bodies. Now, with SWIFT acknowledgment, Galitt is able to provide its excellence and mastery in transaction security to financial institutions worldwide in order to ensure the security of their operations."
