

PRESS RELEASE

With the qualification for its Discover® D-PAS contactless card functional Test Suite, Galitt now proposes a test offer covering all major payment schemes

Boulogne-Billancourt (France), December 11th, 2017

Discover® Global Network has qualified Galitt KaNest®-ICC D-PAS Card Test Suite, a tool allowing card and mobile app issuers to execute automatically card test cases from the Discover® D-PAS Functional Test Plan.

Galitt KaNest®-ICC Contact & Contactless Card Test Suites execute the reference Test Suites defined by payment schemes in order to qualify the functionality of payment. Discover® Global Network has just awarded Galitt the qualification of its KaNest®-ICC Contactless Card Test Suite for the latest version of its specification, which covers both contact and contactless cards.

Galitt KaNest®-ICC Contact & Contactless Card Test Suites can be used to test and validate contact and contactless cards, embedding one or several applications, as well as new contactless form factors. Adapted to both regression testing and validation contexts, KaNest®-ICC Contactless Card Test Suites can be used with equally great results by test laboratories, card and application issuers as well as integrators of payment applications. Galitt test tools enjoy a high recognition by all players on the market as they provide flexibility, ease and comfort in the execution of tests mandated by all major payment schemes.

Highly automated, Galitt test tools allow to execute Test Suites with reduced human intervention as many times as needed, both in the context of certification and for regression testing. Tests are performed automatically and the test tool provides a detailed diagnostics report. When products fail some tests, diagnostics reports provide all the necessary information for developers to adjust their products and ensure they apply the appropriate corrections, thus reducing the product development cycle.

François Inglebert, Marketing Director, Testing Solutions, at Galitt declares: "Galitt is very pleased to obtain from Discover® Global Network this certification for the contactless test tool for cards. Now, we can be proud to have a full offer covering contact and contactless cards and terminals tests for all major payment schemes."

D-Payment Application Specification, or D-PAS, is the Discover® EMV compliant smart card payment solution for both contact and contactless interfaces. Discover Global Network supports and conforms to current EMV standards, allowing for easy implementation and integration of the D-PAS solution.
