

PRESS RELEASE

Abe Technologies, distributor of Galitt Testing Tools in China

Boulogne-Billancourt (France), July 23th, 2018

Abe Technologies Shanghai Ltd. announced its alliance with Galitt to offer the whole range of testing software developed by Galitt, KaNest[®] simulators and VisuCard[®] products in the People's Republic of China. The distribution agreement allows Abe Technologies to sell and support Galitt's simulation tools to facilitate testing and certification for any transactional system, such as smartcards, POS terminals, mobiles, payment networks and hosts as well as control and validation of personalization for any contact and contactless cards.

Mogo Hang, Sales Director, from Abe Technologies declared: "We are very glad to be partner with Galitt. They have very high quality products covering the payment industry level 2 & level 3 testing. They offering very positive, punctual and very efficient service to all the clients. Galitt is very trustworthy partner to us. We are very eager to extend the market with the great support from Galitt."

François Inglebert, Marketing Director – Testing Solutions, within Galitt, stated: "We are very pleased of partnering Abe Technologies in China. They will leverage the use of our tools on transactional and payment systems in the very active and huge Chinese market, due to their high business knowledge of this market and their recognized technical expertise."

KaNest[®] simulators provide a unique customizable test tool to validate messages and interfaces between transactional systems, including card processing systems. The degree of customization and flexibility provided by KaNest[®] gives it a leading position in the testing tool marketplace. KaNest[®]-ICC simulators aim at testing smartcard and accepting devices, having been recognized by the major international card schemes (i.e.: EMVCo, American Express, Discover Financial Services, Mastercard, Visa, etc.) as a tool for certification purposes. The KaNest[®]-File simulators allow users to test and validate file processing. It ensures that batch programs process files in accordance to given formats. VisuCard[®] products are a range of personalization validation tools, supporting contact and contactless cards while implementing testing plans provided by international brands, qualified by the major ones.
