

## KaNest®

This training makes it possible to increase the control of simulators for greater efficiency of the test process

### Main goals

- Learning the appropriate methodology for executing a test plan
- Identify the test options available in the KaNest® product
- Acquire full knowledge of the KaNest® product's interface and its configuration

### Main Advantages

- Understanding test phases and best practices
- Complete view of the KaNest® product
- Handling KaNest® through exercises

### The KaNest® simulator

- General presentation of the KaNest® product
- Repository: definition of a format
- Workshop and Repository : definition of workflows
- Execution and log analysis
- Definition of a test suite
- Principles of maintenance

#### Exercise : Repository creation on sample protocol

From the creation of a repository to the execution of a test suite

### Example of customer context: KaNest® VISA Basel tools

- Presentation
- Installation, Configuration and Use
- Methodology principles : Data Driven Testing (DDT)

#### Exercise : KaNest® VISA Base I

Use of the Repository  
Handling the test suite  
DDT Requester

Duration : 2 days

Prerequisites :  
Basic notions of banking protocols

Price 2021 : 1 500 € HT

For any other protocol (CB2A, Nexo, etc.),  
contact us.
