

PRESS RELEASE

Galitt and KEOLABS SWP & HCI Compliance Test Suite qualified by GlobalPlatform

Boulogne-Billancourt (France), November 18th, 2013

Galitt and KEOLABS are proud to announce that GlobalPlatform has qualified their “SWP & HCI Compliance Test Suite”. The test tool allows users to verify the compliance of HCI (Host Controller Interface) and SHDLG layers of SIM cards that implement a SWP (Single Wire Protocol) connection.

Complexity of mobile handsets is increasing, especially when mobile payments are concerned. Specifications, tests and qualification ensure the full interoperability and security of the whole mobile payment ecosystem.

GlobalPlatform, the organization which standardizes the management of applications on secure chip technology, has established various compliance programs regarding UICC (also known as SIM cards), in particular the compliance verification of HCI (Host Controller Interface) and SHDLG (Simplified High Level Data Link Control) layers of a SIM card that has an SWP (Single Wire Protocol) connection.

Galitt, a long time, full member of GlobalPlatform, submitted KEOLABS’ “SWP & HCI Test Suite” to Global Platform for qualification.

Today, Galitt and KEOLABS are proud to announce that their “SWP & HCI Compliance Test Suite” has demonstrated its ability to fully support GlobalPlatform's functional requirements regarding ETSI SWP/HCI test case execution and is qualified by GlobalPlatform as “GlobalPlatform SWP & HCI compliance Test Suite Version 1.0.”

François Inglebert, Marketing & Offer Director of Galitt, stated, “We are very happy to get this new tool qualification from GlobalPlatform. This confirms that our decision to partner with KEOLABS on this program was a good choice. With the GlobalPlatform “SWP & HCI Compliance Test Suite”, we keep on covering all the different card compliance programs issued by GlobalPlatform and bring to the market a unique and homogeneous range of high-end card test tools.”

Michael Leplatois, President of KEOLABS added, “We are now an integral part of GlobalPlatform’s ecosystem thanks to our partnership with Galitt. Global Platform’s qualification of the “SWP & HCI Compliance Test Suite” brings added legitimacy to a product that has already encountered success with our customers.”

The GlobalPlatform “SWP & HCI Compliance Test Suite” contains nominal cases as well as false parameter cases and covers all the HCI and SHDLG (SWP) features specified by Global Platform. The features covered by the Test Suite are a subset of the ETSI specifications, such as ETSI TS 102 695-2 and ETSI TS 102 694-2. The GlobalPlatform “SWP & HCI Compliance Test Suite” can be acquired from Galitt or KEOLABS.

GlobalPlatform identifies, develops and publishes technical specifications and market configurations, which facilitate the secure and interoperable deployment and management of multiple embedded applications on secure chip technology. Its proven technology is regarded as the international industry standard for building a trusted end-to-end solution which serves multiple actors and supports several business models.

About Galitt (www.galitt.com) – For more than 20 years, Galitt has been offering consulting and services in payment systems and secure electronic transactions. Regarding consulting and assistance, Galitt is providing its customers with services from strategic choices to system implementation via system design and support: business consulting, EFT business analysis and expertise, audit and security, design, specification & project management, acceptance testing, technical assistance and development, training. Engineering and technology activities are covering bespoke development, software integration, turnkey solutions, hosted solutions and testing software. Galitt indeed offers petrol and loyalty card solutions (Catti™), simulators (KaNest®), personalization validation tools (VisuCard®) and added-value solutions (VisuBank®, private labels...).

Being the reference in payment systems and electronic transactions, Galitt is the leader in France in all its businesses, and a worldwide leader in providing test tools and expertise in payment innovation.

About KEOLABS (www.keolabs.com) - KEOLABS is a leading provider of tools and services for testing microcontroller and secure component implementation, which was formed from the fusion of Raisonance and SOLIATIS. The company has two activities: Smart Card Validation and Microcontroller Tools. KEOLABS Smart Card Validation activity provides an end-to-end product and service offer for validating and certifying smart cards and related technologies in accordance with industry standards. KEOLABS participates in all major certification processes for the secure transaction and identity sectors. KEOLABS service branch includes the ISO17025 accredited Certification Center offering test services to all stakeholders in the secure component sector for smart cards, handsets, ePassports, electronic driver's licenses and card readers. KEOLABS Microcontroller Tools activity provides a complete range of tools for creating, editing, debugging and programming deeply embedded microcontroller applications. Known under the Raisonance brand since 1988, this business unit serves customers that include leading component manufacturers and professional engineers worldwide.
