

PRESS RELEASE

MasterCard qualifies the new version of VISUCARD[®] for MasterCard

Boulogne (France), September 6th, 2010

In 2008 summer, within the framework of its new certification program for test tools, MasterCard qualified VISUCARD[®], the Card Personalization Validation tool of GALITT, so-called **VISUCARD[®] for MasterCard**.

In 2010 summer, the MasterCard specifications have been changed, and VISUCARD[®] too! Thus MasterCard has qualified the new version of **VISUCARD[®] for MasterCard** (or VISUCARD[®] MCW) as conformed to MasterCard requirements, version 3.3 dated on May 2010.

Dedicated to personalization bureaus for production controls as well as card issuers who want to check card profiles or analyze cards being returned from the field, **VISUCARD[®] for MasterCard** supports the full range of contact and contactless products of MasterCard Worldwide.

This new qualification confirms the ability of GALITT to anticipate market demands implementing last issued specifications and submitting tools to qualification. GALITT is also proving the ability to design and make its tools evolved, meeting customer's requests and keeping the unsurpassed quality and relevance of its offer.

The new version of VISUCARD[®] is revolutionizing the approach of multi-application in personalization controls. This new version can be already offered for checking cards from MasterCard, VISA, Cartes Bancaires, D-PAS...

Diane WALCH, Marketing Director of GALITT, adds: "The qualification of **VISUCARD[®] for MasterCard** is awarded for the comprehensive job done by GALITT on the VISUCARD[®] offer. Thus GALITT keeps its commitments to make its tools recognized by the main Card Schemes and to support their qualification processes."

VISUCARD[®] allows the user to use qualified Validation Rules provided by GALITT and to define its own rules.

About GALITT (www.galitt.com) – GALITT gathers more than 20 years of experience in mastering e-transactions. Consulting services on payment systems cover the whole project cycle: ANTICIPATE – INITIATE – BUILD – IMPROVE, from a marketing to a technical approach. Company competences include: business consulting, EFT business analysis, design and specifications, project management, acceptance testing and audit. GALITT organizes training sessions dedicated to payments systems and card technologies. GALITT also offers engineering services on transaction systems and embedded software (programming, maintenance), and provides software including simulators (KaNest[®], KaNest[®]-ICC), personalization verification tools (VISUCARD[®]) and added value solutions (VISUBANK[®], private labels...).

GALITT is the recognized leader in France in all its businesses, and the worldwide leader in providing test tools.

Being a reference in the electronic transaction business, GALITT is leveraging internal synergies to provide integrated added value services to the industry.
