

PRESS RELEASE

First reference for the GlobalPlatform UICC Test Suite from GALITT

Boulogne (France), November 29th, 2010

GlobalPlatform technology is becoming essential for markets such as finance, mobile/telecom, government, healthcare, retail and transit. GlobalPlatform specifications provide an open and interoperable infrastructure for smart cards, devices and systems and thus lead to ease issuance of multi-application, multi-actor and multi-business cards.

GALITT identified very early the interest in GlobalPlatform work and joined GlobalPlatform in 2009. This year GALITT implemented, on KaNest[®]-ICC, its well-proven card functional test tool, the GP UICC Card Test Suite which supports GlobalPlatform 2.2 specifications and test plans and requirements released by GlobalPlatform for UICC Configuration.

Today GALITT is proud to announce that a first card manufacturer has chosen the GP UICC Card Test Suite from GALITT to help them developing and marketing GP-based applications. This deal was successfully made by TUV SUD Japan which is distributing GALITT products to the Japanese market.

Francois Inglebert, Sales Director, Software Products of GALITT, stated: "We are very happy to achieve our first reference for GP UICC Card Test Suite. This customer trialed our test tool this summer and found it easy-to-use and appropriate for its sophisticated testing process. The presence of our Japanese distributor, TUV SUD Japan, was also a decisive factor. This shows again that GALITT is trusted by the market and provides adequate, efficient and powerful testing software."

The KaNest[®]-ICC GP UICC Card Test Suite has been cross-tested with card applications during the 'TestFests' organized by GlobalPlatform throughout 2010. It features all the KaNest[®]-ICC characteristics, such as easiness, user-friendliness and abilities to execute tests quickly and to automate test processing. It will be completed by other types of GlobalPlatform configurations when available, such as Mapping Guidelines by the end of the year.

About GALITT (www.galitt.com) – For more than 20 years, GALITT has been offering consulting and services in payment systems and secure electronic transactions. Regarding consulting and assistance, GALITT is providing its customers with services from strategic choices to system implementation via system design and support: business consulting, EFT business analysis and expertise, audit and security, design, specification & project management, acceptance testing, technical assistance and development, training. Engineering and technology activities are covering bespoke development, software integration, turnkey solutions, hosted solutions and testing software. GALITT indeed offers petrol and loyalty card solutions (CATTI[™]), simulators (KaNest[®]), personalization validation tools (VISUCARD[®]) and added-value solutions (VISUBANK[®], private labels...).

Being the reference in payment systems and electronic transactions, GALITT is the leader in France in all its businesses, and a worldwide leader in providing test tools and expertise in payment innovation.
