

PRESS RELEASE

RFI to distribute GALITT Test Tools in Greater China and in India

Boulogne (France), March 22th, 2011

RFI Global Services, a UL company, today announced its alliance with GALITT to offer the KaNest[®] and KaNest[®]-ICC testing and certification tools in Greater China as well as in India. The distribution agreement allows RFI to sell and support GALITT's simulation testing tools to facilitate certifiable testing of smartcard and transactional systems.

Jean-Luc Khaou, Head of Payments & Security at RFI, declared: "We trust this strong alliance with GALITT will enable business opportunities for the benefits of both companies in Greater China and India. By combining our services portfolio and sales force, we will be able to provide our customers an unique payments and security offering in helping for chip and pin migration".

Gerard de MOURA, Managing Director of GALITT, stated: "We believe that the high level of expertise in payment system certification provided by RFI will allow the Chinese and Indian industry to leverage the use of our tools and thus accelerate the validation process and reduce the time-to-market. This agreement also confirms our intent to strongly support very active and promising payment markets such as China and India."

The KaNest[®] simulators provide a unique customizable test tool to validate exchanges between transactional systems, including card processing systems and stock exchanges. The KaNest[®]-ICC simulators aim at testing smartcard and accepting devices, including all EMV-related components. A KaNest[®]-ICC Test Suite has thus been qualified by EMVCo for Type Approval of EMV Level 2 terminals and several Test Suites have been confirmed by Visa Inc. for cards, devices and End-to-End testing.

About RFI Global Services (www.rfi-global.com) - RFI Global Services Ltd, a UL company, is a leading provider of testing, approval and consultancy services to the global technology market. As an independent private company, we use our depth of knowledge, high quality of service and over 20 years of experience to help guide your products through the approvals process, so you can bring them to market in the quickest possible time. Our expertise covers a wide range of technologies including Cellular, Wireless and Smart Card technologies, with particular emphasis on convergent products (i.e. those that combine multiple technologies).

About UL (www.UL.com) - UL is a premier global safety science company with more than 100 years of proven history.
