

## PRESS RELEASE

### *GALITT provides a wide range of EMV test tools supporting Discover Financial Services*

**Boulogne-Billancourt (France), December 21<sup>st</sup>, 2011**

Galitt is pleased to announce the establishment of a partnership with Discover® Financial Services and Diners Club International. In this partnership, Galitt provides a comprehensive set of EMV tools to cover card functional testing, terminal validation, Issuer and Acquirer host testing, Acquirer End-to-End certification and card personalization validation. These tools, which have been qualified by Discover/Diners according to the D-Payment Application Specification (D-PAS), are used by vendors, Diners franchisees, and Discover clients in their EMV migration efforts.

Discover Financial Services has a comprehensive EMV program that is being implemented by Diners Club International franchisees and Discover network clients as they migrate from magnetic stripe to chip card transactions. "Working with partners such as Galitt allows us to ensure the availability of leading-edge technology for our acquirers and issuers as they certify for D-PAS" said Troy Bernard, Director of Chip Payment Products at Discover.

Gérard de Moura, President of Galitt US, declared: "Working with Discover's team to specify and then implement such a set of test tools has been fascinating. Within a challenging timeframe, we were all committed to provide a state-of-the-art environment for Discover Financial Services clients to migrate to EMV. The current achievements are the result of this efficient cooperation and we are proud to be working with Discover/Diners. With such a set of tools, Diners franchisees and Discover clients will save a lot of time in their migrations."

Galitt's comprehensive set of test tools include KaNest® for host and terminal protocol testing, KaNest®-ICC for card and terminal testing, and VisuCard® for personalization validation.

**About Galitt ([www.galitt.com](http://www.galitt.com))** – For more than 20 years, Galitt has been offering consulting and services in payment systems and secure electronic transactions. Regarding consulting and assistance, Galitt is providing its customers with services from strategic choices to system implementation via system design and support: business consulting, EFT business analysis and expertise, audit and security, design, specification & project management, acceptance testing, technical assistance and development, training. Engineering and technology activities are covering bespoke development, software integration, turnkey solutions, hosted solutions and testing software.
